Contents of Volume 104

Number 1, 7 September 1983

ZOLMAN, J. C., Positive Co-operativity in the Membrane Receptor Mediated Response 1

HINEGARDNER, R. and ENGLEBERG, J., Biological Complexity . 7

GADGIL, M., JOSHI, N. V. and GADGIL, S., On the Moulding of Population Viscosity by Natural Selection 21

NOGUEIRA, R. DE A. and CONDE GARCIA, E. A., A Theoretical Study on Heat Production in Squid Giant Axon . . . 43

BERDING, C., HARBICH, T. and HAKEN, H., A Pre-pattern Formation Mechanism for the Spiral-type Patterns of the Sunflower Head 53

MORRISON, P. F., AROESTY, J., CREEKMORE, S. P., BARKER, P. E. and LINCOLN, T. L., A Preliminary Model of Double-Minute-Mediated Gene Amplification 71

RUTBERG, A. T., The Evolution of Monogamy in Primates . . 93

RAO, A. S. and SINGH, R., Theoretical Approaches for Reducing Bioenergetic Costs and Enhancing Plant Productivity . . 113

CALVIN, W. H., A Stone's Throw and its Launch Window: Timing Precision and its Implications for Language and Hominid Brains 121

CLAPP, R. E., Zipper Transition in an Alpha-Helix: A Mechanism for Gating of Voltage-Sensitive Ion Channels in a Biological Membrane 137

ERRATUM 159

Number 2, 21 September 1983

SEIM, E. and SÆTHER, B.-E., On Rethinking Allometry: Which Regression Model to Use? 161

PAUL, R., CHATTERJEE, R., TUSZYŃSKI, J. A. and FRITZ, O. G., Theory of Long-range Coherence in Biological Systems. I. The Anomalous Behaviour of Human Erythrocytes . . . 169

EDELSTEIN, L. and SEGAL, L. A., Growth and Metabolism in Mycelial Fungi 187

COULOMBE, A. and CORABOEUF, E., Simulation of Potassium Accumulation in Clefts of Purkinje Fibers: Effect on Membrane Electrical Activity 211

LERCHE, D., A Biophysical Model for Interaction of Cells with a Surface Coat (Glycocalyx). I. Electrostatic Interaction Profile . 231

GERO, A., Theoretical Treatment of Events Between the Drug-receptor Association and the Effect 249

SHIMIZU, H. and HAKEN, H., Co-operative Dynamics in Organelles 261

KIDD, N. A. C. and MAYER, A. D., The Effect of Escape Responses on the Stability of Insect Host–Parasite Models . . . 275

SCHERER, S., Basic Functional States in the Evolution of Light-driven Cyclic Electron Transport 289

WOLDENBERG, M. J. and HORSFIELD, K., Finding the Optimal Lengths for Three Branches at a Junction 301

ERRATUM 319

Number 3, 7 October 1983

HUMMEL, D., Aerodynamic Aspects of Formation Flight in Birds . 321

VAN STRAALEN, N. M., Physiological Time and Time-invariance . 349

HAVEL, T. F., KUNTZ, I. D. and CRIPPEN, G. M., The Combinatorial Distance Geometry Method for the Calculation of Molecular Conformation. I. A New Approach to an Old Problem . . 359

HAVEL, T., CRIPPEN, G. M., KUNTZ, I. D. and BLANEY, J. M. The Combinatorial Distance Geometry Method for the Calculation of Molecular Conformation. II. Sample Problems and Computational Statistics 383

BROWN, A. P., Codon-level Analysis of Histone Primary Sequence: Evidence of a Repeat Tetrapeptide Origin and Later Inclusion of Transcribed Sequence 401

KELLER, J. B. and FALKOVITZ, M. S., Crawling of Worms . . 417

WEBER, C. E., Corticosteroid Regulation of Electrolytes . . . 443

HODER, N., Developmental Constraints and the Evolution of Vertebrate Digit Patterns 451

Number 4, 21 October 1983

NEWMAN, W. I., The Long-time Behaviour of the Solution to a Nonlinear Diffusion Problem in Population Genetics and Combustion 473

BARDSLEY, W. G., Simple Enzyme Kinetic Mechanisms that can Give All Possible Velocity Profiles with Chemically Reasonable Rate Constant Values 485

MURPHY, L. F., A Nonlinear Growth Mechanism in Size Structured Population Dynamics 493

LECLERCQ, J. and DUMONT, J. E., Boolean Analysis of Cell Regulation Networks 507

FIRESTONE, M. P., DE LEVIE, R. and RANGARAJAN, S. K., On One-dimensional Nucleation and Growth of "Living" Polymers I. Homogeneous Nucleation 535

RANGARAJAN, S. K. and DE LEVIE, R., On One-dimensional Nucleation and Growth of "Living" Polymers II. Growth at Constant Monomer Concentration 553

ORTEGA BLAKE, I., LEŚ, A. and RYBAK, S., The Interaction of γ-Aminobutyric Acid with Hydrated Ca^{2+} and Mg^{2+}. A Pseudopotential *ab initio* Study 571

OKAMOTO, M. and HAYASHI, K., Dynamic Behaviour of Cyclic Enzyme Systems 591

ABDULNUR, S. F. and LAKI, K., A Two-dimensional representation of Relative Orientations of α-Helix Residues 599

ALFANO, F. D., An Information-theory Model of Cellular Survival, Mutation and Transformation and the Relevance of This Model to Chemical Carcinogenesis 605

TYSON, J. J., Unstable Activator Models for Size Control of the Cell Cycle 617

ALMAGOR, H., A Markov Analysis of DNA Sequences . . 633

CHEN, I. I. H., A Mathematical Representation for Vessel Networks II 647

STEWART, D. W. and DWYER, L. M., Stomatal Response to Plant Water Deficits 655

KITAZOE, Y., HIRAOKA, N., UETA, H., OGURA, H., YAMAMOTO, K., SETO, K. and SAITO, H., Theoretical Analysis on Relationship between the Neural Activity and the EEG 667

BARNETT, G., CHIANG, C.-W. N. and LICKO, V., Effects of Marijuana on Testosterone in Male Subjects 685

LETTERS TO THE EDITOR

INCARDONA, N. L., Binding of Viruses and Ligands to Cells: Effect of Receptor Density 693

RZESZOWSKA-WOLNY, J., Is Genetic Code Error-Correcting? . 701

Index to Volume 104

ABDULNUR, S. F. and LAKI, K., A two-dimensional representation of relative orientations of α-helix residues. 599

Aerodynamic aspects of formation flight in birds, 321

ALFANO, F. D., An information-theory model of cellular survival, mutation and transformation and the relevance of this model to chemical carcinogenesis, 605

Allometry, rethinking of; which regression model to use?, 161

ALMAGOR, H., A Markov analysis of DNA sequences, 633

γ-Aminobutiric acid interaction with hydrated Ca^{2+} and Mg^{2+}. A pseudopotential *ab initio* study, 571

AROESTY, J. (see MORRISON, P. F.), 71

Axon, giant, squid, a theoretical study on heat production in, 43

BARDSLEY, W. G., Simple enzyme kinetic mechanisms that can give all possible velocity profiles with chemically reasonable rate constant values, 485

BARKER, P. E. (see MORRISON, P. F.), 71

BARNETT, G., CHIANG, C.-W. N. and LICKO, V., Effects of marijuana on testosterone in male subjects, 685

BERDING, C., HARBICH, T. and HAKEN, H., A pre-pattern formation mechanism for the spiral-type patterns of the sunflower head, 53

Binding of viruses and ligands to cells; effect of receptor density (letter), 693

Bioenergetic cost reduction and enhancement of plant productivity, theoretical approaches for, 113

Biological complexity, 7

Biological systems, theory of long-range coherence in; the anomalous behaviour of human erythrocytes. 169

Biophysical model for interaction of cells with a surface coat (glycocalyx). Electrostatic interaction profile, 231

Birds, aerodynamic aspects of formation flight in, 321

BLAKE, I., LEŚ, A. and RYBAK, S., The interaction of γ-aminobutiric acid with hydrated Ca^{2+} and Mg^{2+}. A pseudopotential *ab initio* study, 571

BLANEY, J. M. (see HAVEL, T.), 383

Boolean analysis of cell regulation networks, 507

Brains, hominid, timing precision and its implications for language and; a stone's throw and its launch window, 121

Branches, three, at a junction, finding the optimal lengths for, 301

BROWN, A. P., Codon-level analysis of histone primary sequence: evidence of a repeat tetrapeptide origin and later inclusion of transcribed sequence, 401

Ca^{2+} and Mg^{2+}, hydrated, the interaction of γ-aminobutiric acid with; a pseudopotential *ab initio* study, 571

CALVIN, W. H., A stone's throw and its launch window: timing precision and its implications for language and hominid brains, 121

Carcinogenesis, chemical, an information-theory model of cellular survival, mutation and transformation and the relevance of this model to, 605

Cell cycle, unstable activator models for size control of, 617
Cell interaction with a surface coat (glycocalyx), a biophysical model for; electrostatic interaction profile, 231
Cell regulation networks, Boolean analysis of, 507
Cells, binding of viruses and ligands to; effect of receptor density (letter), 693
Cellular survival, mutation and transformation, an information-theory model of, and the relevance of this model to chemical carcinogenesis, 605
CHATTERJEE, R. (see PAUL, R.), 169
Chemical carcinogenesis, an information-theory model of cellular survival, mutation and transformation and the relevance of this model to, 605

Codon-level analysis of histone primary sequence: evidence of a repeat tetrapeptide origin and later inclusion of transcribed sequence, 401
Coherence, long-range, in biological systems, theory of; the anomalous behaviour of human erythrocytes, 169
Combinatorial distance geometry method for the calculation of molecular conformation. A new approach to an old problem, 359
Combinatorial distance geometry method for the calculation of molecular conformation. Sample problems and computational statistics, 383
Combustion, the long-time behaviour of the solution to a nonlinear diffusion problem in population genetics and, 473
Complexity, biological, 7
CONDE GARCIA, E. A. (see NOGUEIRA, R. DE A.), 43
Conformation, molecular, the combinatorial distance geometry method for the calculation of; a new approach to an old problem, 359
Conformation, molecular, the combinatorial distance geometry method for the calculation of; sample problems and computational statistics, 383
Co-operative dynamics in organelles, 261
Co-operativity, positive, in the membrane receptor mediated response, 1
CORABOEUF, E. (see COULOMBE, A.), 211
Corticosteroid regulation of electrolytes, 443
Costs, bioenergetic, reduction of, and enhancement of plant productivity, theoretical approaches for, 113
COULOMBE, A. and CORABOEUF, E., Simulation of potassium accumulation in clefts of Purkinje fibers: effect on membrane electrical activity, 211
Crawling of worms, 417
CREEKMORE, S. P. (see MORRISON, P. F.), 71
CRIPPEN, G. M. (see HAVEL, T. F.), 359, 383
Cyclic electron transport, light-driven, basic functional states in the evolution of, 289
Cyclic enzyme systems, dynamic behaviour of, 591

DE LEVIE, R. (see FIRESTONE, M. P.), 535
DE LEVIE, R. (see RANGARAJAN, S. K.), 553
Developmental constraints and the evolution of vertebrate digit patterns, 451
Diffusion problem, nonlinear, in population genetics and combustion, the long-time behaviour of the solution to, 473

Digit patterns, vertebrate, developmental constraints and the evolution of, 451
DNA sequences, a Markov analysis of, 633
Double-minute-mediated gene amplification, a preliminary model of, 71
Drug-receptor association and the effect, theoretical treatment of events between, 249
DUMONT, J. E. (see LECLERCQ, J.), 507
